

Round 10 - First Half

2022-23 Elementary Practice Questions

1. Composers often think of this musical element first and add harmony to it later. It is a group of pitches played one after another. Give the official name for a song's tune.

MELODY

2. Ten-year-old Annemarie Johansen narrates this novel set in World War Two-era Copenhagen. Annemarie's family helps Ellen Rosen's family escape to Sweden so they won't be sent to a Nazi concentration camp. What is this first Newbery-winning novel by Lois Lowry?

NUMBER THE STARS

3. This number is an identity element for real numbers. The product will not change when a real number is multiplied by this number. What is the identity element for multiplication?

1 (ONE)

4. This natural phenomena can be defined as a disturbance of air. Give the name for this phenomena that is measured in decibels and perceived by the human ear.

SOUND

5. This President was born in Kentucky and was nicknamed the "rail splitter." He was a Whig who later became a Republican. What "honest" man became the 16th President of the United States?

(ABRAHAM) LINCOLN

6. Country singer Jimmie Rodgers popularized this singing technique in the U.S. It requires fast switching between the low chest and high falsetto voice. Give the name of this technique heard in the Swiss Alps.

YODEL(ING)

7. This Caldecott winner is a companion book to works about bears and turtles. In this middle book of the trilogy, a small fish steals an object from a much larger fish. Give the title of this Jon Klassen [KLAH-sin] book.

THIS IS NOT MY HAT

8. Consider the number 27 and 803 thousandths. (27.803) Which number is in the ones place?

SEVEN

9. When you are in a car stopped at an intersection, you have a velocity of zero. Once the light changes to green, your driver will step on the gas pedal, increasing in speed until you reach the desired cruise control setting. What is the term for this increase of speed, the change in velocity over a given amount of time?

ACCELERATION

10. The salt springs here attracted prehistoric animals, Native Americans, and pioneers. What state park is known as the site of the last Revolutionary War Battle in Kentucky?

BLUE LICKS (BATTLEFIELD STATE RESORT PARK)

11. This brass instrument practically ties the trumpet for the title of loudest orchestral instrument. Before about 1700, it was called the sackbut. Give the name of this instrument, which changes notes by way of a telescoping slide.

TROMBONE

12. This kind of lyric poem arose in Italian Renaissance courts. In England, Shakespeare wrote 154 examples in a slightly different format. Identify this 14-line poem.

SONNET

13. Helen and Lisa are selling balloons for the fall carnival. In the first hour, Hannah sold 3 balloons and Lisa sold 5 balloons. If they both keep selling at the same rate, how many balloons will they sell in 5 hours?

40 (BALLOONS)

14. During photosynthesis, a plant accepts radiant energy in order to convert it to another, more useful type. What type of energy do plants produce when they make use of photosynthesis to create sugar?

CHEMICAL (ENERGY)

15. This Native American tribe formed the strongest connection to Kentucky. Its lands covered most of the state. What Native American tribe's most famous leader was Tecumseh?

SHAWNEE

16. This composer called for cannons in his 1812 Overture. Odette and Siegfried are two of the main characters in his ballet Swan Lake. Give the name of this composer of The Nutcracker.

(PYOTR) TCHAIKOVSKY [chigh-KAWF-skee]

17. This novel's supporting characters include folk historian James K. Lewis and independent Lurhetta Outlaw. The title boy sits atop a pole as he ponders ways to save his family's ancestral home, Sarah's Mountain. Identify this Newbery-winning novel by Virginia Hamilton.

M.C. HIGGINS, THE GREAT

18. There were three-fifths of Granny's Great Cherry Pie left after lunch. Granddad ate one-fifth of the pie for an afternoon snack. How much of the pie was left?

2/5 (OF THE PIE) (ACCEPT: 2 OVER 5)

19. Often times our geologic landscape is changed by violent events like earthquakes. In 1964, an Alaskan earthquake of massive scale was followed by many smaller earthquakes shortly thereafter. What is the term for these smaller earthquakes that follow a large earthquake and sometimes go on for many days or weeks?

AFTERSHOCK(S)

20. Oceania is a region that contains this continent plus many islands in the Pacific Ocean. What continent "down under" is famous for its kangaroos and koalas?

AUSTRALIA

21. When this dance form began in the 1500s, the French king and royal court members adapted steps from social dances. After Louis the Fourteenth founded the Royal Academy of Dance, only professionals performed it. The plié [plee-AY], jeté [zhuh-TAY], and pirouette [peer-uh-WET] are basic movements in what dance discipline?

BALLET

22. This figure of speech appears in the sentence, "The stars are dancing a jig in the sky." Name this device that gives human qualities to animals, objects, or ideas.

PERSONIFICATION

23. The school fall festival had 11 balloon booths and 5 fishing booths. Three fishing booths close. What is the ratio of the remaining balloon booths to fishing booths?

11:2 (ELEVEN TO TWO) (ACCEPT: 11/2 OR 11 OVER 2)

24. This weather phenomenon is one of the many sources of erosion on Earth. The intensity of this phenomenon is measured on the Beaufort scale. Typically caused when warm and cold fronts meet, what is the name for this phenomenon, examples of which are breezes and gales?

WIND

25. This is one of the specialized fields of human geography. What field of geography studies the spaces and places dedicated to young people?

CHILDREN'S (GEOGRAPHY)

26. Before the waltz, this dance in 3/4 time was popular in European courts. Couples performed elegant floor patterns as they displayed their fancy outfits. Identify this dance, whose name comes from the French for "small."

MINUET

27. This fable illustrates cognitive dissonance--the condition of holding two conflicting ideas in your mind. In it, the title animal repeatedly tries and fails to reach a bunch of fruit hanging high on a vine. Identify this Aesop fable, which ends with the animal concluding that the fruit must be sour.

(THE) FOX AND THE GRAPES

28. Gerald had 90 baseball cards. He gave his brother 70 percent of his cards. How many cards did he give his brother?

63 (CARDS)

29. While many scientists believe that this planet once had water on its surface, extensive searches have found only dry basins. Name this planet, the fourth from the sun, which shares its name with the Roman god of war.

MARS

30. This prehistoric refuse heap contains shells and human artifacts. They usually date from the late Mesolithic period. What are these mounds also called Kitchen middens?

SHELL (MOUNDS)

END OF FIRST HALF – Begin three minute inquiry period

Round 10 - Second Half

2022-23 Elementary Practice Questions

1. In 1681, this man danced with King Louis the Fourteenth in The Triumph of Love. As director of the Royal Academy of Dance, he devised the five basic ballet positions. Identify this first choreographer of the Paris Opéra.

(PIERRE) BEAUCHAMP [bo-SHAHN]

2. Two years after this man delivered his 1964 speech "A Time for Choosing," he was elected Governor of California. As U.S. president, he addressed the nation after the Challenger explosion in January 1986. Name this leader who, in 1987, urged the Soviet Union's Mikhail Gorbachev to, quote, "tear down this wall."

(RONALD) REAGAN

3. A horse is 17 hands tall. Each hand equals 4 inches. How many inches tall is the horse?

68 (INCHES)

4. Leukocytes, or white blood cells, use this process to protect the body from bacterial infections. Name this process also carried out when protists use their cell membranes to ingest nutrients.

ENDOCYTOSIS

5. This assembly was established to pass laws for the Jamestown Colony in Virginia. What was this first English representational government in the North American colonies?

HOUSE OF BURGESSES

6. Other names for this stage include platform and open stage. A modeling catwalk is one example of this earliest type of Western staging. In what seating arrangement is the audience on three sides of the stage?

THRUST (STAGE)

7. At one time, this Latin prefix came before "sonics" in the name of a Seattle NBA team. You might also find it before "natural," "market," and "man." Identify this prefix meaning "above" or "beyond."

SUPER- (Accept stated or spelled)

8. This polygon has interior angles measuring close to 180 degrees. It has 10 to the 100th number of sides. What polygon's name sounds like a search engine?

GOOGOLGON

9. The stroma within this organelle is the location of the Calvin cycle, which is also known as the dark reactions, and these organelles are often contrasted with mitochondria because both convert energy. Name these organelles evolved from cyanobacteria that conduct photosynthesis and are green.

CHLOROPLASTS

10. This President was impeached in 1998. He is the husband of the woman who lost the 2016 presidential election. Who was the 42nd President of the United States?

(BILL) CLINTON

11. This color term is the opposite of tint. What does an artist create when she adds black to a hue in order to darken it?

SHADE

12. The first part of this compound word is a caffeinated drink popular in England. The second part is a utensil. Identify this cooking unit of measure equal to 1/3 of a tablespoon.

TEASPOON

13. To cover the baseball field, the park needs a tarp that measures 90 feet on each side. In square feet, what is the area of the tarp that the park will need?

8100 (SQUARE FEET)

14. Insects molt because they outgrow this structure, which is usually made of chitin. This protective structure is also present in crustaceans and shelled mollusks such as snails and clams. Name this structure that helps support an animal from the outside, unlike an endoskeleton.

EXOSKELETON

15. This branch of the U.S. government has two houses. What branch of government makes laws?

LEGISLATIVE (BRANCH)

16. Jan [YAHN] Vermeer's View of Delft is one of these paintings. Georgia O'Keeffe explored the genre in Shelton with Sunspots and Radiator Building at Night. Give the word for an urban landscape.

CITYSCAPE

17. Which words should be capitalized in the following sentence? My mom asked, "Will you please wash the dishes?"

MY (AND) WILL (either order)

18. You have a bag that contains two red balls, four green balls, and one orange ball. You close your eyes and reach into the bag. As a fraction in reduced form, what is the probability that you will pull out an orange ball?

1/7 (ONE-SEVENTH) (ACCEPT: 1 OVER 7, 1 OUT OF 7)

19. The competitive exclusion principle prevents two of these groups from occupying the same "niche." A classification more specific than genus is what title subject of a book by Darwin about their Origin?

SPECIES

20. This is one of the main responsibilities of a citizen. What should citizens do to select their leaders?

VOTE

21. This 1872 painting shows the port of Le Havre [luh AHV-ruh], France. Green boats float in blue-green water as a bright orange circle hangs in the background. What is this Claude Monet painting that gave an art movement its name?

IMPRESSION, SUNRISE

22. Like the exclamatory sentence, this part of speech often expresses strong emotion. Identify this part of speech, examples of which are "wow" and "oh."

INTERJECTION

23. Howard has 3 green shirts and 7 blue ties and 2 yellow hats. How many possible outfits of shirts, ties, and hats can he make?

42 (FORTY-TWO)

24. DNA replication is a continuous cycle in the cells of living things. During this process, however, environmental factors or random mistakes can occur that change the replication. What is the term for a change in a gene that can be inherited by future generations.

MUTATION

25. Pineapples from Hawaii are examples of these goods. What are goods or services sold to another country?

EXPORT(S)

26. The Cherokee used this dance in part to remove evil spirits from the Earth. Dancers wear feathers and turquoise to symbolize the weather phenomena they hope to cause. Give the name of this dance meant to induce precipitation.

RAIN (DANCE)

27. What kind of dependent clause is part of the following sentence? We adopted the two dogs because they are a bonded pair.

ADVERB(IAL) (CLAUSE)

28. When school started there were 20 students in the fourth grade. Eight more students enrolled on the second day, but one student moved on the third day. How many students are in the class now?

27 (STUDENTS)

29. The International Space Station at any given time has a finite amount of supplies on board and must have other ships to bring necessary supplies or transport astronauts home. Joining two spacecraft together is no easy task, but happens by way of ports on the station and with the help of the robotic arm that is there. What is the term for joining two crafts in space which shares its name with the term for parking a boat?

DOCKING

30. This monument was designed by Thomas Casey. It is located in the center of Washington, D.C. What is this large obelisk that memorializes our country's first President?

WASHINGTON MONUMENT

END OF ROUND SECOND HALF – Begin three minute inquiry period

EXTRA QUESTIONS

AH. In June 2022, this star donated \$1 million to Vanderbilt University for pediatric infectious disease research. She donated to Middle Tennessee flood relief and to victims of the 2016 fires in her native Sevier County. Who is this Imagination Library founder and singer-songwriter of "9 to 5" and "Jolene"?

(DOLLY) PARTON

LA. Spelling required. The company expects to quadruple its profits next quarter. Spell the word in the previous sentence meaning "multiply by four."

Q-U-A-D-R-U-P-L-E

MA. Solve the mathematical expression by substituting 3 for the variable n . What is the value of $12n$ plus 2?

38 (THIRTY-EIGHT)

SC. Increased efficiency comes from multi-junction parts, and this is harnessed by crystal layers of doped semiconductors in an electric field under a cover plate. Several recent projects have combined this power source with thermoelectric. Name this power source utilizing photovoltaic cells often used by space stations because they are not impacted by cloud cover.

SOLAR (POWER)

SS. She was an associate justice of the Supreme Court. She wrote dissents to cases that did not improve women's rights. What feminist icon is known for her distinctive collar?

(RUTH BADER) GINSBURG
