

Round 11 - First Half

2022-23 Elementary Practice Questions

1. Characters in this novel's flashbacks include Kissin' Kate Barlow, Madame Zeroni, and Elya Yelnats. Stanley befriends Zero as the boys solve the mystery of Camp Green Lake. Name this Newbery Medal-winning novel by Louis Sachar [SACK-er].

HOLES

2. If you multiply four-fifths by this multiplier, the product will be four-fifteenths. What is this fractional multiplier?

$\frac{1}{3}$ (ONE-THIRD) (ACCEPT: 1 OVER 3)

3. This musical idea's symbol is the crosshairs--an oval with a cross through it. It can range from a few measures to an entire section of the piece. Give the word for a passage that ends a musical movement or composition.

CODA

4. The Wilderness Road passed through this site in Danville. The home of this site was chosen to be Kentucky's first seat of government. What place in Kentucky has a bronze statue of the state seal surrounded by plaques dedicated to all of Kentucky's governors?

CONSTITUTION SQUARE

5. In science, mixtures can have either the same or different composition throughout. For example, if you fill a bucket with sand at the beach which contains small shells it will not be the same throughout. What type of mixture is this, one in which the individual substances are not evenly mixed?

HETEROGENEOUS (MIXTURE)

6. This picture book's title character spends her night running down the sidewalk, through the garden, past the field, and by the pond. She mistakenly believes the sky holds a large bowl of milk. Name this Caldecott winner by Kevin Henkes [HANK-us].

KITTEN'S FIRST FULL MOON

7. You have a die with the numbers 1 through 6. What is the probability of rolling a 7 with this die?

0 (ZERO)

8. Music historians distinguish this type of music from art--that is, classical--music. Its performers are often amateurs who have learned the music orally instead of seeing it written down. Identify a country's or culture's traditional music handed down among ordinary people.

FOLK (MUSIC)

9. This Kentuckian was known for his civil rights activism. He was born in Louisville and was a professional boxer. What boxer "stung like a bee" as he won gold at the 1960 Olympic Games in Rome?

(MUHAMMAD) ALI (ACCEPT: (CASSIUS) CLAY)

10. A bicycle travels 240 meters in 6 minutes. In meters per minute, at what average speed is the bicycle traveling?

40 (METERS PER MINUTE)

11. This poet titled one of his elegies for Abraham Lincoln "When Lilacs Last in the Dooryard Bloom'd." He also elegized the president in "O Captain! My Captain!" Who was this 19th-century poet of "Song of Myself," part of his Leaves of Grass?

(WALT) WHITMAN

12. When this additive inverse is added to negative 5, the sum will equal zero. What is the additive inverse of negative 5?

(POSITIVE) 5

13. This word can name a four-stringed, low-pitched electric guitar. It also refers to the largest and deepest-sounding drum. Give this word for the lowest male singing voice and for a type of clef.

BASS

14. This 20,310 feet tall mountain was formerly named Mt. McKinley. What is this tallest mountain peak in North America?

(MOUNT) DENALI

15. Sometimes materials hold electrons more loosely than other materials. When this happens, electrons can easily move from one object to another, producing a charge. What is this phenomenon that you often see in the winter when your hair stands on end after you put on a sweater?

STATIC (ELECTRICITY)

16. At this novel's conclusion, Mr. Pluto and his son Mayhew live peacefully with the protagonist's family. That family, the Smalls, help preserve the treasures found in their new residence, which was once a stop on the Underground Railroad. Name this Virginia Hamilton novel.

(THE) HOUSE OF DIES DREAR

17. A certain decimal number has three places to the right of the decimal point. Identify the place value of the third digit to the right of the decimal.

THOUSANDTHS

18. Two of this composer's operas were Don Giovanni and Così fan tutte [kaw-ZEE fawn TOO-tay]. He also wrote The Marriage of Figaro and the Jupiter Symphony. Which Classical composer's final work was the unfinished Requiem?

(WOLFGANG AMADEUS) MOZART

19. The geography of these areas is focused on villages, towns, and cities. Louisville and New York City are examples of these areas. What is a densely populated area like a city?

URBAN (AREA)

20. Found in bogs and swamps, this organic material is typically made up of vegetable matter. As the matter builds up, over time it becomes carbonized, breaking down. What is the term for this carbonized vegetable matter from which all coal deposits originate?

PEAT

21. Examples of this figure of speech include, "The snow is a white blanket," and, "You are the apple of my eye." What is this comparison between two unlike things without using the words "like" or "as"?

METAPHOR

22. The numbers 12 and 18 have four common factors. What is the greatest common factor of 12 and 18?

6 (SIX)

23. This dance is called noho if the performer is sitting and luna if he is standing. Its first dance was supposedly for the fire goddess Pele. Give the name of this storytelling dance native to Hawaii.

HULA

24. These Portuguese plantations were worked by enslaved people. What plantations, set up in the Americas, grew and harvested sugarcane?

SUGAR (PLANTATIONS)

25. As part of the water cycle, water evaporates from the ground and is trapped in the atmosphere before it reaches higher altitudes, cools, and condenses. The water vapor in the air, however, still has an effect on plant and animal life, often leaving us humans to feel "muggy". Give the term for the amount of water vapor in the air, measured with a hygrometer.

HUMIDITY

26. This tall tale man was a real folk hero whose death in 1900 led to a ballad. Born in Kentucky, he saved the fireman and all the passengers on a speeding train near Vaughan, Mississippi. Give the name of this locomotive engineer.

(JOHN LUTHER "CASEY") JONES

27. There are fifteen barrels in the shed. Seven of the barrels are empty. What is the ratio of filled barrels to empty barrels?

8:7 (EIGHT TO SEVEN) (ACCEPT: 8/7 OR 8 OVER 7)

28. This dancer's professional debut was in the Denishawn ballet Xochitl [so-CHEET-ul]. Her work throughout the 20th century earned her the nickname "mother of modern dance." Give the name of this choreographer of Appalachian Spring.

(MARTHA) GRAHAM

29. Month and day please. On what day does the United States celebrate its independence from England?

July 4

30. This two-word term is used to designate one result of a supernova. It is defined as a relatively small but extremely dense body from whose gravitational pull nothing can escape. What is the name of this heavenly body?

BLACK HOLE

END OF FIRST HALF – Begin three minute inquiry period

Round 11 - Second Half 2022-23 Elementary Practice Questions

1. In some versions of this fairy tale, the title character is called Henny Penny. She encounters a rooster, a duck, a goose, and a turkey on her way to visit the king. Foxy Loxy spells doom for the animals in what fairy tale, whose protagonist fears the sky is falling?

CHICKEN LITTLE (ACCEPT: CHICKEN LICKEN)

2. One inch equals 2.54 centimeters. How many inches are equal to 5.08 centimeters?

2 (INCHES)

4. The final battle of this war was fought after the peace treaty was signed. It was called "Mr. Madison's War." What war between Great Britain and the United States ended with the signing of the Treaty of Ghent?

(WAR of) 1812

5. They are typically protein molecules that bind to their favored location by way of an area known as an active site. Although pepsin was possibly the first one to be discovered, they typically end in "ase". Give the name for these biological molecules that speed up cellular reactions.

ENZYMES

6. This Greek prefix means "many" or "much." Give this prefix that can appear before "gon" or "theism."

POLY- (Accept stated or spelled)

7. Kelly wants to measure the bathmat in inches. The box says it is 1 yard long. How many inches long is the bathmat?

36 (INCHES)

8. Among this musical's characters are Jack Kelly, Katherine Plumber, and Joseph Pulitzer. Adapted from a 1992 Disney movie, it features the songs "Seize the Day," "Santa Fe," and "Carrying the Banner." Identify this musical based on an 1899 paperboy strike in New York City.

NEWSIES

9. During this time, the United States tried to recover from the Civil War. What was the period immediately following the Civil War called?

RECONSTRUCTION

10. Tendrils and spines are modified types of these structures that usually consist of a petiole and blade. Name these flat, green plant structures, the major site of photosynthesis.

LEAVES (LEAF)

11. One member of this homophone pair is an iron-carbon alloy metal that can be stainless. The other member names something baseball players can do to a base. Give the shared pronunciation of these words, one of which is a synonym of "rob."

STEEL/STEAL (ACCEPT EITHER ONE OR BOTH)

12. This polygon can be found in nature. A honeycomb is made up of these polygons. What polygon has six sides?

HEXAGON

13. The aerial type of this art technique relies on color and clarity to depict distance. The linear type can be one-, two-, or three-point. Give the word for the depiction of three dimensions in two-dimensional paintings and drawings.

PERSPECTIVE

14. The Supreme Court is the highest court in the land and represents this branch of the government. This branch interprets the meaning of laws. What branch decides if laws are constitutional?

JUDICIAL (BRANCH)

15. This body part is "compound" in most insects. The retina, located here, is an area of this body part that processes light signals and sends them to the brain through the optic nerve. Name this body part that helps invertebrates see.

EYE

16. This punctuation shows a closer relationship between independent clauses than a period does. It can correct a comma splice. Identify this punctuation that looks like a dot placed above a comma.

SEMICOLON

17. The cover of a notebook is 8 inches tall and 10 inches wide. What is the area of the notebook's cover in square inches?

80 (SQUARE INCHES)

18. This ancient Greek architectural order featured slender, fluted columns with capitals that resembled acanthus [uh-KAN-thus] leaves. It was the latest to develop and the most ornate of the three orders. Name this counterpart of the Doric and Ionic orders.

CORINTHIAN (ORDER)

19. This responsibility of citizenship is important in law. What duty should you complete if you are called?

JURY (DUTY)

20. Parts of this structure fuse to form the human sacrum. A sideways curve of this structure is called scoliosis, and CSF is extracted by a "tap" of this body part. Thoracic, cervical, and lumbar segments make up what structure that invertebrates do not possess?

SPINE (ACCEPT: BACKBONE, VERTEBRAL COLUMN)

21. Words in this part of speech are either correlative [kuh-REL-uh-tiv], subordinating, or coordinating. What are these words that connect words, phrases, and clauses?

CONJUNCTION(S)

22. This question requires a fraction in reduced form. You have two fair six-sided dice. What is the probability of rolling a sum of 12 with the pair of dice?

1/36 (ONE-THIRTY-SIXTH) (ACCEPT: 1 OVER 36, 1 OUT OF 36)

23. This artist joined the Impressionists at the request of her friend Edgar Degas [day-GAH]. Her portraits included Little Girl in a Blue Armchair and The Child's Bath. Name this painter, whose favorite subjects were women and children.

(MARY) CASSATT [kuh-SAHT]

24. People use these two things to meet their needs and wants. What are these backbones of a traditional economy?

GOODS (AND) SERVICES

25. This area of the brain controls the body's movements. It is also the center of thought, feelings, and memory. Identify this largest part of the brain.

CEREBRUM

26. What is the following sentence's adjective clause? There is the lemur that we are going to feed.

THAT WE ARE GOING TO FEED
