After dead and decaying leaves, insects, and animals are left on the soil surface, these organisms are responsible for breaking them down into useable pieces again. Give the name of these organisms which break down dead and decaying matter to return the nutrients to the soil.

DECOMPOSERS

10. Correct the following sentence, if needed: Every Saturday, my brother and sister shops for groceries.

CHANGE "SHOPS" TO "SHOP" (Accept equivalents)

11. A regular septagon measures 7 units on each side. Determine the perimeter of the septagon.

49 (UNITS)

12. For artistic forms, this adjective applies to the cube, sphere, and pyramid. For shapes, it applies to the circle, square, and triangle. What is this opposite of organic forms and shapes?

GEOMETRIC

13. Only one state has a unicameral legislature. Which western state has a single house legislature?

NEBRASKA

14. Air and water movement within soil is important for agriculture and some organisms help this by churning up the soil so that air and water can mix through. What invertebrate, in the phylum Annelida, improves soil by making tunnels so that resources like air and water can move through with ease?

(EARTH)WORMS

15. Spelled one way, this word is a synonym of "story." Identify this word that, spelled another way, names the long appendage on a cat's or dog's rear.

TALE/TAIL (ACCEPT EITHER ONE OR BOTH)

16. There are five purple marbles and one green marble in a bag. If you draw a marble without looking, what is the probability that the marble will NOT be green?

5/6 (FIVE-SIXTHS) (ACCEPT: 5 OVER 6, 0.83 REPEATING, 83.3% REPEATING, 5 OUT OF 6)

17. Paintings of this type include Cezanne's Mont Sainte-Victoire [mohn sant veek-TWAR] and Van Gogh's Wheatfield with Crows. Constable's The Hay Wain and Monet's Poplars are further examples. Give the word for an artwork that showcases natural scenery.

LANDSCAPE

18. An addition to the Constitution guarantees this right to citizens. What right does the Second Amendment of the Constitution protect?

(TO) KEEP AND BEAR ARMS (ACCEPT SIMILAR RESPONSE)

19. The first of the three germ cell layers to develop in an embryo, it is responsible for the integumentary system. Two parts of this are the neural crest and neural tube, which form most of the nervous system. Name this outermost layer in developing embryos, located outside the mesoderm and endoderm.

ECTODERM

20. Which of the following sentence's words should be capitalized? My science teacher, Miss Harris, is getting married next spring.

MY, MISS, (AND) HARRIS (any order)

21. A bookshelf in the library had 2 red books on the first shelf and 4 red books on the second shelf. The third shelf has 8 red books and the fourth shelf has 16 red books. If the pattern continues, how many red books will be on the fifth shelf?

32 (RED BOOKS)

22. Art critic Louis Leroy said one of this man's sketchy landscapes reminded him of wallpaper. That artist also painted Rouen [roo-AHN] Cathedral and haystacks in different seasons and at different times of day. Name this Impressionist artist, whose Giverny [zhee-vair-NEE] garden inspired his Water Lilies series.

(CLAUDE) MONET

23. This decline in spending can last for months or years. What economic condition is less severe and shorter than a depression?

RECESSION

24. Appearing in both red and yellow varieties, this tissue comprises a small percent of our body weight. What is the spongy, interior portion of bone whose main function is to build red and white blood cells?

(BONE) MARROW

25. Every word in this part of speech is either concrete or abstract. Some are proper, while others are common. Identify the part of speech that refers to people, places, things, and ideas.

NOUN(S)

26. Substitute 23 for the variable in the following expression. What is the value of the expression $126 + y$?

149 (ONE HUNDRED FORTY-NINE)
