

## Round 9 - First Half 2022-23 Elementary Practice Questions

1. This question requires multiple answers. What must the units digit be in order for a number to be divisible by 5?

0 (or) 5 (NOTE: ORDER IS NOT REQUIRED)

2. This accidental resembles a lowercase B. It performs the opposite operation of a sharp. Which accidental means a musician should lower a note by one-half step?

FLAT

3. The Federal Hill mansion at this site celebrated its 200th birthday in 2018. What site in Kentucky is named for Kentucky's state song?

MY OLD KENTUCKY HOME (STATE PARK)

4. Although an object's mass will remain the same on different planets, this quantity may change. What is this property, a measurement of the amount of gravitational force acting on an object?

WEIGHT

5. How many hyphens does the following sentence need? The candidate won the election with sixty-six and two-thirds percent of the vote.

TWO

6. Juan finished a race with a time of 12.57 seconds. The only other runner finished with a time of 12.36 seconds. By how many seconds did Juan win the race?

0.21 (SECONDS) (ACCEPT: TWENTY-ONE HUNDREDTHS (SECONDS))

7. This music genre combines African, Caribbean, and Spanish influences. Celia Cruz popularized this style, which shares its name with a Latin American dance. Identify this music, whose name is Spanish for "sauce."

SALSA

8. This racetrack was founded in 1875 on land owned by Meriwether Lewis Clark. What racetrack began a tradition of horseracing called the "Home of the Kentucky Derby"?

CHURCHILL DOWNS

9. In physics, speed is a measure of how fast or slow an object is moving. With no thought given to direction, speed, unlike another scientific quantity, is always positive. Which sister quantity in physical science takes into account distance, time AND direction for an accurate calculation?

#### VELOCITY

10. This novel's protagonist, Katie Takeshima, has a younger brother named Sammy and an older sister named Lynn. Katie's life changes when Lynn dies from lymphoma, a blood cancer. Give the Japanese title of this Newbery winner by Cynthia Kadohata [KA-doh-HA-tuh].

#### KIRA-KIRA

11. The park has a track with 7 lanes. The coach uses three-sevenths of the track for sprinting practice. Using simple fractions, how much of the track is NOT used?

4/7 (OF THE TRACK) (ACCEPT: 4 OVER 7)

12. At one corner of this instrument, its metal rods don't touch, allowing the instrument to vibrate. It hangs from a string or a small piece of leather as the player hits it with a beater. Identify this small percussion instrument that shares its name with a geometric shape.

#### TRIANGLE

13. This imaginary line is located in the Pacific Ocean. It defines the boundary between one day and the next. What zigzagged line marks the eastern and western hemisphere divide?

#### INTERNATIONAL DATE ( LINE)

14. Because energy can neither be created nor destroyed, it must undergo constant changes. For example, a roller coaster moving downhill will begin with high potential energy that quickly changes to kinetic energy. What is the term for these changes in energy from one form to another?

#### (ENERGY) TRANSFORMATIONS

15. In this nearly wordless picture book, a young girl in a red coat rescues a wild animal pup. She returns that pup to its pack, who howl to let the lost girl's parents know where to find her. Identify this Caldecott winner by Matthew Cordell.

#### WOLF IN THE SNOW

16. The Mexican restaurant served 8 tacos in 10 minutes. At this rate how many tacos will the restaurant serve in one-half hour?

24 (TACOS)

17. This Romantic composer nicknamed two of his symphonies Pastoral and Eroica [uh-ROH-ick-uh]. He may have dedicated his piano piece Für Elise to a woman named Terese. Name this composer of Moonlight Sonata.

(LUDWIG VAN) BEETHOVEN

18. This question requires two answers. What two statistics about a population are shown in a population pyramid?

AGE, SEX (EITHER ORDER)

19. At times, volcanic eruptions are so violent that they damage the structure of the volcano itself. Name the type of crater formed when a volcano produces so much lava that it collapses in on itself.

CALDERA

20. This poet used similar titles for "Early Moon" and "Child Moon." The speaker emphasizes the strength and fragility of words in his poem "Little Girl, Be Careful What You Say." Name this Illinois poet of "Fog."

(CARL) SANDBURG

21. Lawrence's free throw percentage is 60 percent. He shot 30 free throws during practice. How many free throws did he make?

18 (FREE THROWS)

22. Virtuosos in this dance form included Bill "Bojangles" Robinson, Gregory Hines, and Savion [SAY-vee-ahn] Glover. West African step dances and British Isles clogging and jigs combined to create this percussive form. What is this dance in which metal plates on shoes' soles create loud sounds?

TAP (DANCE)

23. This Frenchman made three expeditions to the New World. He laid French claims to North America and named Canada. What mariner was the first European to navigate the St. Lawrence River?

(JACQUES) CARTIER

24. In the day time, these clouds appear brighter than any other cloud in the sky. Appearing like streamers or tufts of hair, you can watch their movement to see which way approaching weather is moving. What is the name for these short, detached, hair-like clouds found at high altitudes?

CIRRUS (CLOUDS)

COTTON GIN

4. Somatic cells of humans have 44 of these. Give the name for these non-sex chromosomes, the entire complement of genetic code except for X and Y.

AUTOSOMES

5. Different tall tales characterize this man as an oilfield worker, a buffalo hunter, and a railroad man. Most stories make him a cowboy who invented the lasso and the branding iron. Name this owner of the horse Widow-Maker and husband of Slue-Foot Sue.

PECOS BILL

6. For his math assignment, Julio had to draw a circle with a diameter of 3 inches. Then he had to determine the circumference of the circle. What is the circumference of the circle in terms of pi and in inches?

3 PI (INCHES)

7. On a small scale, this word means removing a prop or set piece from a stage. What word also names the process of dismantling a set and storing costumes and props to make room for another production?

STRIKE (Accept word forms)

8. He was the commander of PT-109 when it was hit by a Japanese destroyer. He wrote Profiles in Courage. What president was assassinated in Dallas on November 22, 1963?

(JOHN F.) KENNEDY (ACCEPT: JFK)

9. Phyla in this group include ginkgos and conifers. Bearing a name which translates to "naked seed," name this group of plants that lack an enclosed chamber for its seeds, as opposed to angiosperms.

GYMNOSPERMS

10. Among this fairy tale's characters are a grandfather, Sasha the bird, Ivan the cat, and Sonya the duck. Soviet composer Sergei Prokofiev [pro-KAH-fee-ev] set it to music in 1936. Give the name of this story about a young boy who saves his human and animal friends from a large predator.

PETER AND THE WOLF

11. You roll a fair 11-sided die numbered 1 to 11. As a fraction in reduced form, what is the probability of rolling a 10?

1/11 (ONE-ELEVENTH) (ACCEPT: 1 OVER 11, 1 OUT OF ELEVEN)

12. Traditionally, this art form doesn't allow artists to cut their materials. Instead, they create simple or elaborate creases to make flowers, animals, or inanimate objects like boxes. Give the Japanese word for the art of paper folding.

ORIGAMI

13. This chamber of Congress has 435 members. Which lower chamber of Congress's membership is based on state populations?

HOUSE (OF REPRESENTATIVES)

14. The blue-ringed type of these animals is poisonous to humans. They do not have a skeleton, but do have a beak near their mouth. These animals are quite intelligent and can shoot ink in self-defense. Name these mollusks that live up to their name by having eight arms.

OCTOPUS

15. This Latin root is sometimes found after "e-," "dis-," or "bank." What is this root meaning "break" or "burst"?

RUPT (Accept stated or spelled)

16. Mr. Garcia's class was conducting experiments with coin flips. They flipped a coin 25 times and it landed on heads 14 times. What is the experimental probability of the coin landing on heads?

14/25 (FOURTEEN-TWENTY-FIFTHS) (ACCEPT: 14 OVER 25, 14 OUT OF 25, 0.56, 56%)

17. This Doric temple once housed a large statue of the goddess Athena. A replica, complete with Athena statue, stands in Nashville. The ruins of what temple stand on the Acropolis in Athens?

(THE) PARTHENON

18. Besides freedom of speech, this amendment also makes worship a right of U.S. citizens. What amendment guarantees freedom of religion?

FIRST (AMENDMENT) (ACCEPT: (AMENDMENT) ONE)

19. Mobbing is one strategy for opposing these organisms, whose keystone examples include the sea otter in kelp forests. Herbivores like deer can be considered this type of organism in relation to plants, while typical "apex" ones include the polar bear, lion, and great white shark. Name these organisms that hunt for prey.

PREDATORS

20. The first part of this compound word is an antonym of "give." The second part is an antonym of "in." What is this word for food prepared in a store or restaurant that's meant to be eaten somewhere else?

TAKEOUT

21. Sam had 20 vacation days and he took 18 of them. Then he received 3 more days as a bonus. How many vacation days does he have now?

5 (VACATION DAYS)

22. This man made the subjects of his painting Three Musicians resemble collages. He painted The Old Guitarist in 1904 during his Blue Period. Give the name of this co-founder of Cubism.

(PABLO) PICASSO

23. These two syllable places have been a part of civilization for centuries. What is a way for buyers and sellers to come together to exchange goods and services?

MARKET

24. Certain disorders can cause pain and inflammation in the body. This disorder comes in varieties such as osteo, rheumatoid, and juvenile. What is the term for the chronic conditions that cause pain and swelling, primarily in the joints?

ARTHRITIS

25. Identify the following sentence's indirect object: For the book fair, Mom gave Oscar \$10.

OSCAR

26. Kelly replaced the variable with a 6 to solve the mathematical expression. What process did she use to solve the expression?

SUBSTITUTION

27. In early America, this folk art came in broderie perse [BRO-duh-ree PAIRCE], medallion style, and whole-cloth varieties. When fabric prices increased, the patchwork style predominated. Identify this bed covering made of two stitched fabric layers with a soft substance in between.

QUILT(S)

28. This small federally owned island is located in New York and is appropriately named. On what island, which is very near Ellis Island, is the Statue of Liberty located?

LIBERTY (ISLAND)

29. Two word answer, please. Without one, a computer system would be very difficult to use. These programs contain the specialized set of instructions that the computer will follow in order to complete basic tasks. What are these special programs, examples of which are O. S. ten and Windows?

OPERATING SYSTEM

30. What is the following sentence's grammatical structure? When the fireworks started, the dog ran away, but he later came home.

COMPOUND-COMPLEX (SENTENCE)

**END OF ROUND SECOND HALF – Begin three minute inquiry period**

### EXTRA QUESTIONS

MA. This figure has two equal angles opposite two equal sides. The third angle is not equal to the other two. What kind of triangle is it?

ISOSCELES (TRIANGLE)

AH. One member of this sports dynasty is a senior at Isidore Newman School in New Orleans. His uncles won Super Bowls for the New York Giants, Indianapolis Colts, and Denver Broncos. Give the last name of quarterbacks Arch, Peyton, and Eli.

MANNING

SS. Elon Musk introduced this humanoid robot in 2022. It could lift its leg and grip its hand. What robot's name means one of the best?

OPTIMUS

SC. In critiquing an opposing theory, he criticized the separate treatment of each planet, as had been done by Ptolemy (TAHL-eh-mee). Name the Polish astronomer who first proposed the theory of heliocentrism.

COPERNICUS

LA. Spelling required. Defeating an ignorant person in an argument is impossible. Spell the word from the previous sentence that means "uninformed."

I-G-N-O-R-A-N-T
