

1. This music element is a group of notes of different pitches played one after another. Identify this element that makes up a song's tune.

MELODY

2. Despite being mortal, this novel's protagonist learns how to haunt people's dreams and make himself invisible. The Owensens raise Bod, who defeats the man Jack with the Sleer's help. A cemetery is the setting of which Neil Gaiman [GAY-mun] novel?

(THE) GRAVEYARD BOOK

3. This question requires multiple answers. What four basic mathematical operations can be performed using real numbers?

ADDITION, SUBTRACTION, MULTIPLICATION, DIVISION

4. This substance's states include plasma, gas, liquid, and solid. Everything in the universe, except for energy, consists of it. What is this substance made of atoms?

MATTER

5. Kentucky's Knobs region roughly forms a horseshoe around this larger region, which includes the cities of Louisville and Lexington within it. Identify this region whose name references Kentucky's state nickname.

BLUEGRASS (REGION)

6. Happy Times Hotel has 14 floors with 20 rooms on each floor. If half of the rooms are reserved, how many rooms are left?

140 (ONE HUNDRED FORTY) (ROOMS)

7. This book reassures readers that, despite automation, the title structure is "built to last forever." It follows the keeper's life as he marries, has a child, and saves a sunken ship's passengers from drowning. Identify this book, which earned a Caldecott Medal for Sophie Blackall.

HELLO LIGHTHOUSE

8. In 2020, this sporting event was held in September, the first time since World War Two that it has not been held on the first Saturday in May. What sporting event, known as the "Run for the Roses," is held yearly at Churchill Downs?

KENTUCKY DERBY

9. This secular music style developed from enslaved people's praise songs, chants, and spirituals. The so-called Delta ones originated near the mouth of the Mississippi River. B. B. King performed what kind of music with repeating structures and sad lyrics?

(THE) BLUES

10. Newton described this property in his First Law of Motion. It is an object's resistance to changing its velocity - that is, its speed and direction. Identify this tendency of an object to remain in motion or at rest unless acted on by an unbalanced force.

INERTIA

11. In this circuit type, the current amount differs at different points. Adding more light bulbs to this circuit won't cause any of the bulbs to dim. Name this kind of circuit that has a separate branch for each device.

PARALLEL (CIRCUIT)

12. This percussion instrument has curved corners, with one corner slightly open. Smaller ones are pitched higher than larger ones, but they all hang from a piece of leather or string. Identify this instrument named for the three-sided shape it resembles.

TRIANGLE

13. In this form of geographic measurement, the Equator is designated as 0 degrees. What measurement uses lines called parallels to describe the north-south position of a point on Earth?

LATITUDE

14. One poem of this type is "The Mouse's Tale" from *Alice's Adventures in Wonderland*. Name this type of poem written in the shape of its subject.

CONCRETE (POEM)

15. A school day at Harper Elementary lasts 6 hours and 30 minutes. Convert this time to a mixed number of hours in reduced form.

SIX AND ONE-HALF (HOURS)

16. This composer probably wrote *Für Elise* for one of his students, Therese. He titled his only opera, which premiered in 1805, *Fidelio*. Give this composer's name, whose *Ninth Symphony* contains the "Ode to Joy."

(LUDWIG VAN) BEETHOVEN

17. This author wrote of Louis, a mute bird, in *The Trumpet of the Swan*. His first children's book was inspired by a dream about a tiny boy who acted like a mouse. Give the name of the author of *Stuart Little*.

(E(LWYN) B(ROOKS)) WHITE

18. Paleontologists study these specific scientific remains. They may be true form, cast, trace, or mold. What are these remains of animals, plants, and other organisms often found in sedimentary rock?

FOSSIL(S)

19. Originating in Northern China, this language form is often called "Northern Chinese." Give the name for this form of Chinese, the country's most widely spoken.

MANDARIN (CHINESE)

20. A mosaic in the hallway has 6 red trapezoids for every 16 green triangles. What is the ratio of triangles to trapezoids?

8:3 (EIGHT TO THREE) (ACCEPT EIGHT OVER THREE OR EIGHT-THIRDS)

21. This type of character usually fights against an antagonist. However, a character in this role doesn't have to be a so-called "good guy." What is this Greek-rooted name for a work's main character?

PROTAGONIST

22. Though this settlement was burned by Native Americans in 1566, it was successfully relocated and remained the first permanently occupied European settlement in the New World. Give the name of this settlement, established in a coastal area of Florida by Spanish settlers.

ST. AUGUSTINE

23. This man's daughter Cosima married fellow composer Richard Wagner [RIKH-ahrt VAHG-nuhr]. He was a piano prodigy who composed *Transcendental Etudes*. Identify this Romantic Era composer of *Hungarian Rhapsodies*.

(FRANZ) LISZT

24. These clouds form from 13,000 to 66,000 feet above sea level. They form at high altitudes, usually before a weather change. Name these thin, wispy clouds made of ice crystals.

CIRRUS (CLOUD(S))

25. Give your answer as a decimal to the hundredth place. One thousand meters equals one kilometer. Convert 36,910 meters to kilometers.

36.91 (KILOMETERS)

26. This polygon can be drawn using a compass. What polygon contains 360 degrees around a central point?

CIRCLE

27. This cryptid first gained widespread fame in 1933, thanks to an *Inverness Courier* article. Some believers argue it is a surviving plesiosaur [PLEE-see-uh-sawr], an extinct marine reptile. Identify this creature that supposedly inhabits a Scottish lake.

(THE) LOCH NESS MONSTER

(USS) MONITOR

35. Terry is buying a new carpet for her bedroom. Her room is 10 feet long and 12 feet wide. How many square feet of carpet will she need?

120 (SQUARE FEET)

36. This musical is based on the memoir *The Story of the Trapp Family Singers*. Set in Austria, it follows Maria's transition from the nunnery to nannyng 7 children. Name this final Rodgers and Hammerstein musical, whose songs include "Do-Re-Mi" and "My Favorite Things."

(THE) SOUND OF MUSIC

37. This Latin suffix can mean "process" or "act." Give this suffix that might follow "enjoy" or "state."

-MENT (Accept stated or spelled)

38. At the lunch counter, a customer can choose 4 different burgers, 3 salads, 2 desserts, and 2 drinks. A customer chooses only one item from the menu. How many possible choices does the customer have?

11 (CHOICES)

39. This vascular plant tissue consists of cells with rigid, thick walls. Its dead tissue forms hollow pipes that run from the roots through the stems and into the leaves. Name this tissue that transports water throughout a plant.

XYLEM [ZI-lum]

40. The Panic of 1873 occurred during the presidential administration of this man who had served as the U.S. Army's Commanding General during the American Civil War. What Union general would later become the United States' 18th president?

(PRESIDENT or GENERAL ULYSSES S. "U.S.") GRANT

41. Spelled one way, this word names a part of the human foot. Spelled another way, it is a synonym of "mend." Give these words' shared pronunciation.

HEEL/HEAL (ACCEPT EITHER ONE OR BOTH)

42. He served as Judge/Executive of Jefferson County, Kentucky, before he was elected a U.S. senator in 1984. Since 2021, he has served as the Senate's Minority Leader. Name Kentucky's senior U.S. senator.

(ADDISON MITCHELL "MITCH") MCCONNELL

43. Consider the expression $5x$ plus 3. What part of the expression is the variable?

X

44. Except for spiders and scorpions, almost all arthropods have these paired sensory appendages. Crustaceans have primary and secondary pairs on their first two head segments. Identify these jointed, movable appendages that help insects touch and smell the world.

ANTENNA(S) (Accept ANTENNAE)

45. Multiple answers are required. These 3 hues in art are the complementary colors of green, violet, and orange. State the three primary colors in the artist's color wheel.

RED, YELLOW, (AND) BLUE (any order)

46. Solve for S in the following equation. Twelve plus fifteen plus S equals forty. What is the value of S?

13 (THIRTEEN)

47. Along with the stabile [STAY-bile], Alexander Calder invented this type of art. It is a kinetic sculpture whose moving parts are driven by motors or wind. Identify this type of object that sometimes dangles above a baby's crib.

MOBILE

48. These respiratory organs are found in crustaceans, mollusks, and insects. Many amphibians and all fish also possess them. Identify this feathery tissue that allows aquatic animals to breathe.

GILL(S)

49. The percentage of voters participating in this process is often called "turnout." What term refers to the formal process in which voters can cast their vote to accept or reject political propositions or select an individual to fill a public office?

ELECTION

50. Rarely, this punctuation mark can form the plurals of certain abbreviations, letters, or words. It can come before or after an S when forming a possessive. Identify this punctuation found in contractions.

APOSTROPHE

51. Sally has \$10.00 and wants to buy her mom four balloons. The balloons cost \$2.25 each. How much money will she have left?

\$1.00 (ONE DOLLAR)

52. Subjects of the painting series by this artist included poplars, Rouen [roo-AN] Cathedral, and haystacks. He also painted the Japanese footbridge and the water lilies in his Giverny [zhee-vair-NEE] garden. Name the artist of *Impression: Sunrise*.

(CLAUDE) MONET

53. Its inventor is known by the pseudonym Satoshi Nakamoto. It is recognized by its logo featuring the capital letter B on an orange circle. Give the name for this most recognized and widely used form of cryptocurrency.

BITCOIN

54. This soft, yellowish organ produces enzymes to help the body digest food. It also produces the hormones glucagon [GLOO-kuh-gon] and insulin. What is this organ whose malfunction can cause diabetes?

PANCREAS

55. Identify the following sentence's indirect object: Bobby baked Benjamin a pan of brownies.

BENJAMIN

56. Identify the following sentence's noun clause: My mom encouraged me to remember who I was.

WHO I WAS

57. Despite its name, this scientific branch also studies plants, animals, and non-living things like sand and rocks. Seafloor geology, marine ecosystems, and current patterns are some of its focuses. Give the name for the study of Earth's saltwater bodies.

OCEANOGRAPHY

58. Baker Bob used 14 ounces of sugar to make cookies and 14 ounces to make brownies. Then he used 12 more ounces of sugar to make candy drops. As a mixed number, how many pounds of sugar did Baker Bob use?

2 and 1/2 (TWO AND ONE-HALF POUNDS)

59. A poster designed by J.M. Flagg helped popularize this character as a national symbol of patriotism. Name the character Flagg represented, pointing above the words, "I Want You For U.S. Army."

UNCLE SAM

60. These folk art objects were originally carved using seashells, sharpened stones, bones, and beaver teeth. Six Pacific Northwest tribes traditionally made them for weddings, memorials, and myth remembrance. Identify these large wooden poles sculpted and painted to resemble animals.

TOTEM (POLE)

End of Second Half – Begin Three-Minute Inquiry Period

Extra Questions

61. This pastime first required an artist to remove a surface's imperfections with shark's skin or pumice. Then, he used a needle or pocket knife to carve a portrait or seascape. Name this art form in which sailors carved walrus tusks or whalebone.

SCRIMSHAW

62. Spelling required. The physical education teacher must gauge each student's activity level. Spell the word in the preceding sentence that means "to appraise, estimate, or judge."

G-A-U-G-E

63. A geometric sequence begins with 4, 16, 64. What is the next term in the sequence?

256 (TWO HUNDRED FIFTY-SIX)

64. This inventor of one of the first smokeless powders combined guncotton and nitroglycerin to form blasting gelatin. He made his fortune by inventing dynamite. Identify this man who lent his name to global prizes for literature, economics, various sciences, and peace.

(ALFRED) NOBEL

65. In 2018, the Supreme Court of this western U.S. state barred voters from deciding whether or not the state should be divided into three new states. What western U.S. state is the country's most populous?

CALIFORNIA
