

1. In music, this Italian word is a synonym of diminuendo [dih-MIN-yoo-IN-doh]. It resembles a "greater than" sign in math. Identify this symbol that tells a musician to gradually play or sing more softly.

DECRESCENDO

2. You learn that 7 times 8 is 56. You also learn that 8 times 7 is 56. What property of multiplication states that the product is the same regardless of the order of the numbers multiplied?

COMMUTATIVE (PROPERTY OF MULTIPLICATION)

3. As this novel opens, the title character runs away from his uncle and aunt's home and arrives in segregated Two Mills, Pennsylvania. He befriends Amanda Beale, former baseball player Earl Grayson, and eventually, his rival Mars Bar Thompson. Identify this Newbery-winning Jerry Spinelli novel.

MANIAC MAGEE

4. This city began experiencing rapid population growth in the mid 1980's when it was selected as the site of the Toyota Motor Manufacturing Kentucky factory. Name this Kentucky city, the county seat of Scott County.

GEORGETOWN

5. Ernest Rutherford discovered these subatomic particles in 1920. The number of them present in an atom's nucleus indicates what element the atom belongs to. Name these positively charged subatomic particles.

PROTON(S)

6. This question requires multiple responses in correct order. List the following numbers in order from least to greatest: 17, 70, 5, and 32.

5, 17, 32, 70 (MUST BE IN THE GIVEN ORDER)

7. This book ends with its author realizing he loves two places: Japan and California. Most of the story occurs in the late 1800's, when the author's ancestor immigrated from East Asia to the United States. What is this autobiographical Caldecott winner by Allen Say?

GRANDFATHER'S JOURNEY

8. This Kentucky-native had served as Secretary of War under President Franklin Pierce before being chosen to serve as the president of a breakaway republic in 1861. Who served as president of the Confederate States of America during the American Civil War?

(JEFFERSON) DAVIS

9. In the Middle Ages and the Renaissance, this was one of Western music's two primary genres. Today, it encompasses genres like rock, jazz, and hip-hop. Give the word for non-religious music.

SECULAR

10. The fastest one of these in the universe belongs to light and is represented in an equation by the letter *c*. It is a scalar quantity that, like velocity, is often measured in meters per second. What is this measure of how fast an object moves relative to a reference point?

SPEED

11. Diamond is a good one of these for heat but a bad one for electricity. To varying degrees, all metals are this for both electricity and heat. What is this opposite of an insulator?

CONDUCTOR(S)

12. Types of this instrument include suspended, finger, and crash. They are part of a drum kit but can also be heard in orchestras. Identify these thin metal disks that are struck with a mallet or hit against each other.

CYMBAL(S)

13. Individuals involved in this practice use such tools as scale and projection to create specific representations of the Earth or lands within it. Give the name for the science and practice of making maps.

CARTOGRAPHY

14. This poetic form has both Italian and English versions whose rhyme schemes differ. One poem of this type is "How Do I Love Thee?" by Elizabeth Barrett Browning. Name this kind of 14-line lyric poem.

SONNET

15. This multiple of nine has factors of one and two. It also has factors of three and four. What number equals 12 when it is divided by nine?

108 (ONE HUNDRED EIGHT)

16. The composer hid many Freemason symbols in this 1791 opera. Pamina [puh-MEE-nuh] and Tamino [tuh-MEE-no] join forces with Sarastro [suh-RAH-stroh] to defeat the Queen of the Night. Give the title of this final Mozart opera.

(THE) MAGIC FLUTE

17. In this novel, a 12-year-old boy becomes apprenticed to his community's Receiver of Memory. However, he escapes that village with the infant Gabriel, who is scheduled to be killed the next day. Identify this prequel of *Gathering Blue*, *Messenger*, and *Son*, all written by Lois Lowry.

(THE) GIVER

18. Soil of this type has smaller particles than sand or silt. It is plastic when wet, meaning it can be rolled, pinched, or sculpted into a variety of forms. Name this substance that can produce long-lasting bricks, pipes, or flowerpots after it dries and hardens.

CLAY

19. Communities organized by members of this religious group form a popular tourist destination in Lancaster County, Pennsylvania. Give the name for this group and related lifestyle generally characterized by plain clothing and the rejection of modern technology.

(OLD ORDER) AMISH (MENNONITE) (ACCEPT: (OLD ORDER) MENNONITE)

20. The waitress at Joe's Drive-In is filling salt shakers from a 3 pound box of salt. The waitress divides the salt equally between 15 shakers. As a fraction in lowest terms, how many pounds of salt will go in each salt shaker?

1/5 (ONE-FIFTH POUND)

21. Like legends, these ancient stories often featured gods or fantasy creatures. Part of the oral tradition, they usually tried to explain natural phenomena like the world's creation. Name these fictional stories found in cultures from Greece and Rome to China, Mexico, and Peru.

MYTH(S)

22. Illegal immigrants who entered the United States before adulthood may be referred to by this name which comes from an acronym for the Development, Relief, and Education for Alien Minors Act. Give this name, most often used in reference to undocumented students and children, that might also describe a group of sleeping individuals.

DREAMERS

23. This folk dance incorporates steps from the quadrille, English Country Dance, and Morris Dance. Those steps include the promenade, allemande, and do si do [DOE SEE DOE]. What is this dance for four couples, whose name indicates the shape they make on the floor?

SQUARE (DANCE)

24. Unlike its white counterpart, the black type of this weather phenomenon is invisible and more damaging. Farmers adjust their growing season to occur between the last one in the spring and the first one in the fall. When water condenses and freezes out of the air, what thin white coating results?

FROST

25. Harper receives a 20 percent tip for each dollar she earns. She earned \$55.00 on Tuesday. How much did she receive in tips on Tuesday?

\$11.00 (ELEVEN DOLLARS)

26. A certain bridge will support vehicles that weigh 5 tons. An empty truck and driver weigh 6,550 pounds. How many pounds of cargo can the truck carry across the bridge?

3,450 (POUNDS)

27. Some translations of this fable paint the title characters as cousins, while others say they're only friends. The animals eat simple food at a rural home but, when they try to eat a rich meal in the city, two large dogs interrupt their feast. Which Aesop fable teaches, quote, "Better beans and bacon in peace than cakes and ale in fear"?

(THE) TOWN MOUSE AND THE COUNTRY MOUSE

28. A war named for this Native American leader, fought from 1675 to 1676, is considered one of the bloodiest conflicts in American history. Name this son of Massasoit who waged war against New England's colonists.

(KING) PHILLIP (ACCEPT: METACOM)

29. This dance's traditional form resembles Cuba's rumba and Puerto Rico's bomba. Percussion instruments provide a beat in 2/4 time as dancers shift their weight from one leg to the other. Give the name of this national dance of Brazil.

SAMBA

30. Spots on this celestial body's surface appear and disappear in 11-year cycles. Its so-called "wind" consists of particles ejected from its outer layer, the corona. Name this center of our solar system.

(THE) SUN

End of First Half – Begin Three-Minute Inquiry Period

Round 5 - Second Half

Elementary – 2023 Region

31. This organelle is only found in eukaryotic [yoo-kare-ee-AH-tik] cells. It consists of a porous envelope, chromatin [KRO-muh-tin], and a nucleolus [noo-klee-OH-lus]. What is this organelle that directs a cell's reproduction, growth, and metabolism?

NUCLEUS

32. This man choreographed and appeared in one of the first dance films, 1912's *Dances of the Ages*. The school and company he co-founded with his wife trained modern dancers like Martha Graham. Identify this founder of Jacob's Pillow and husband of Ruth St. Denis.

(TED) SHAWN

33. This Nobel Peace Prize winner titled his final speech "I've Been to the Mountaintop." He wrote "Letter from Birmingham Jail" after being imprisoned for demonstrating against Alabama segregation. Which civil rights leader, during the 1963 March on Washington, delivered his "I Have a Dream" speech?

(MARTIN LUTHER) KING (JR.)

34. This document was signed on November 21, 1620 aboard a ship anchored in a Massachusetts harbor. Name this document on how to govern Plymouth Colony, agreed to by the Pilgrims and named for the ship which brought them to the New World.

MAYFLOWER COMPACT

35. The angles of an equilateral triangle are congruent. What is the measure in degrees of an interior angle in any equilateral triangle?

60 (DEGREES)

36. In theater, a soliloquy [suh-LIL-uh-kwee] is a special type of this. Acting schools, agents, and casting directors often require a performer to deliver one or more of them. Give the word for a theatrical speech by a single character.

MONOLOGUE

37. In a certain saying, being "put out to" this place means a person, animal, or thing is past its prime. State this word beginning with P for grassland used for grazing livestock.

PASTURE

38. A rectangular box is 12 inches long by 9 inches wide. How many inches of ribbon will be needed to go around the box?

42 (INCHES)

39. In narrow leaves, these structures lie parallel to each other, but they are net-like in broader leaves. They provide a skeleton of sorts and also carry food and water to and from the leaves. What are these plant parts that share their name with a type of human blood vessel?

VEIN(S)

40. In December 1860, this southern state became the first to secede from the Union. Identify this state, which in April 1861 was the site of the Battle of Fort Sumter and the official beginning of the American Civil War.

SOUTH CAROLINA

41. One word with this pronunciation names a small room in a prison or an organism's basic structural unit. Another word pronounced this way is the opposite of "purchase." Give the shared pronunciation of these words.

CELL/SELL (ACCEPT EITHER ONE OR BOTH)

42. Before he was elected president, he served as secretary of state in the administration of his predecessor, Andrew Jackson. Who was elected in 1836 as the United States' eighth president?

(MARTIN) VAN BUREN

43. There are 6 orange marbles and 5 blue marbles in a bag. What is the probability of picking a blue marble from the bag without looking?

5/11 (FIVE-ELEVENTHS)

44. Long mistaken for plants, these animals help build and maintain coral reefs. A skeleton supports its soft mass of cells, while spongy skin lets water flow inside. Name these members of the phylum Porifera [puh-RIF-uh-ruh], which are full of holes.

SPONGE(S)

45. Be specific. This structure can be used to dry wood, melt metal, or heat limestone. Name this furnace or oven also used for baking bricks and firing pottery.

KILN

46. Adding an even integer and nonzero non-even integer will result in this type of integer. What type of integer will result when adding two even integers and one nonzero non-even integer?

ODD (INTEGER)

47. This kind of artwork may be group, singular, or self-. Today's iPhone cameras have a mode called this, which puts the subject in focus and blurs the background. Give the word for a painting, drawing, or photograph of one or more people.

PORTRAIT

48. Only one species of this bird lives near the Equator--specifically, in the Galápagos [guh-LAH-puh-gohs] Islands. The rest reside in the far Southern Hemisphere, where they eat krill and use their flippers to swim, but not fly. What are these black-and-white swimming birds found partly in Antarctica?

PENGUIN(S)

49. In 2020, this American city's NFL team retired its previous name and logo due to potential insensitivity towards Native Americans. What city's NFL team is now known as the Commanders?

WASHINGTON (D.C.)

50. How many words in the following sentence need to be capitalized? Chloe asked, "Will you watch *The Little Mermaid* with me?"

FIVE

51. The first basket has 36 eggs; the second basket has 24 eggs and the third basket has 12 eggs. Following this arithmetic pattern, how many eggs will be in the fourth basket?

0 (ZERO EGGS) (ACCEPT SIMILAR RESPONSE)

52. This artist's 1884 painting *Children Playing on the Beach* shows the influence of Japanese printmaking. Among her other works are *Lilacs in a Window*, *The Cup of Tea*, and *Girl Arranging Her Hair*. Which Impressionist painted *Nurse Reading to a Little Girl*?

(MARY) CASSATT [kuh-SAHT]

53. Doug Emhoff became the first American to fill this title when his wife, Kamala Harris, became vice-president. Give the title for the husband of a vice-president of the United States.

SECOND GENTLEMAN

54. In humans, this body system is divided into the axial and appendicular [ap-in-DIK-yoo-lur] sections. Adult ones typically have 206 components, including the vertebral column, rib cage, and skull. Name this system made of the bones that protect softer organs.

SKELETON (Accept SKELETAL (SYSTEM))

55. Identify the following sentence's predicate nominative: "Melinda is a guitarist in a local rock band."

GUITARIST

56. State the following sentence's noun clause: "They have a surprise for whoever wins the competition."

WHOEVER WINS THE COMPETITION

57. Scientists often prefer these pieces of lab equipment to beakers when they need to handle or store multiple small samples. Made of Pyrex--heat-resistant glass--they allow for easy heating of samples. Name this thin cylinder with a U-shaped bottom and an open top.

TEST TUBE(S)

58. Solve for N in the following equation. Seventeen minus N equals negative one. What is the value of N?

(N EQUALS) 18

59. A basic definition for this economic term is "a person cannot have everything they want." What term do economists use to explain that not all resources can be available to all people all of the time?

SCARCITY

60. One California tribe made this craft out of planks, while the Chippewa and Ojibwe [oh-JIB-way] created birch bark ones. In the Pacific Northwest, tribes carved dugout ones from cedar trunks. Identify these narrow, open boats that were propelled by paddles or, in a few cases, sails.

CANOE(S)

End of Second Half – Begin Three-Minute Inquiry Period

Extra Questions

61-AH. At age 22, this man entered the Jesuit order, but didn't take his final vows until 1973. He was archbishop of Buenos Aires and then a cardinal before succeeding Benedict the Sixteenth in his current role. As of February 2023, who is this Roman Catholic pope?

(POPE) FRANCIS (THE FIRST)

62-LA. Spelling required. "The detectives undertook a thorough investigation." Spell the word from the preceding sentence that means, quote, "extremely attentive to accuracy and detail."

T-H-O-R-O-U-G-H

63-MA. Kelly rode her bike for one-half mile. If there are 1,760 yards in one mile, how many yards did Kelly ride?

880 (EIGHT HUNDRED EIGHTY YARDS)

64-SC. This scientist investigated gravity by dropping items off the top of the Leaning Tower of Pisa. He built his own telescope and made discoveries that proved Copernicus's [kuh-PER-nick-us] heliocentric theory. Which Italian scientist discovered Jupiter's four largest moons?

GALILEO (GALILEI)

65-SS. After this document was approved by the Second Continental Congress on November 15, 1777, it was ratified by all states and went into effect on March 1, 1781. What document served as the United States' first framing document until it was replaced eight years later by the U.S. Constitution?

ARTICLES OF CONFEDERATION (AND PERPETUAL UNION)
