(RONALD) REAGAN

29. This type of energy can be converted to electrical energy in a battery, and is a form of potential energy. It usually involves compounds. What is this energy of molecular bonds?

CHEMICAL (ENERGY)

30. Jason has 25 baseball cards and Rob has 75. What is the ratio of the number of Jason's cards to the number of Rob's cards?

1 to 3 (Accept ONE-THIRD)

End of First Half – Begin Three-Minute Inquiry Period

Round 6 - Second Half

Elementary Regional – 2022 Governor's Cup

1. Examples of these machines include the balance and the seesaw. One component of them is a rigid beam. Name these simple machines, which involve a fulcrum.

LEVER

2. This document was ratified in June of 1788 and went into effect in March of 1789. It includes seven articles and 27 amendments. Name this document that sets forth the rules for U.S. government.

(UNITED STATES) CONSTITUTION

3. This formal kind of balance may be radial or bilateral. Identify this quality that a shape has if it is identical on both sides of an imaginary axis.

SYMMETRY

4. This suffix might follow "age," "end," or "use." Give this suffix that, as a standalone word, is the opposite of "more."

LESS

5. Jerry has 2 pairs of pants, 8 shirts and 2 pairs of shoes. Using just these items, how many different outfits can Jerry wear if each outfit consists of 1 pair of pants, 1 shirt, and 1 pair of shoes?

32 (OUTFITS)

6. This Latin American dance combined elements of the danzón [dahn-SOHN] and mambo. It requires two slow forward-and-back steps followed by three quick side steps. Give the repetitive name of this Cuban dance.

CHA-CHA(-CHA)

7. These temporary cell extensions are often found in amoebae [uh-ME-bay]. They are often used for propulsion. Give this term, meaning "false foot."

PSEUDOPOD [SOOD-uh-pod] (Accept PSEUDOPODIA)

8. This Kentucky region is shaped like an arc and wraps around the southern and eastern parts of the Bluegrass region. It is the smallest of Kentucky's geographic regions. Identify this hilly region of Kentucky.

(THE) KNOBS (REGION)

9. This fable's moral is "Gratitude is the sign of a noble soul." It ends with the Roman emperor freeing both of the title characters, who have faced off in an arena. Name this Aesop fable about an escaped slave who removes a thorn from a large cat's paw.

ANDROCLES AND THE LION

10. Sheila is making a list of the positive factors of 18. How many numbers are on the list?

11. The first part of this compound word is a primary color whose complementary color is orange. The second part can mean "to publish a manuscript" or "a reproduction of an original artwork." Identify this compound word for a detailed plan that shows how a building will be constructed.

BLUEPRINT

12. This type of symmetry is contrasted with the bilateral variety, which is seen in almost all animals. Pentagonal symmetry is often considered a subtype of it, which is exhibited in sea stars. Identify this form of symmetry that can be rotated about a central point.

RADIAL (SYMMETRY)

13. This musical's songs include "Hopelessly Devoted to You," "Summer Nights," and "You're the One That I Want." Its characters, members of the T-Birds and the Pink Ladies, attend Rydell High School in 1959. Sandy and Danny fall in love in what musical named for a product that makes hair shiny?

GREASE

14. This battle was also known as the Battle of Chaplin Hills. It was the biggest Civil War battle fought in the state of Kentucky. What was this Civil War battle, fought in Boyle County, Kentucky?

(BATTLE OF) PERRYVILLE

15. Suppose it takes Jack 3 and one-half seconds to run a 10 meter dash. If he was able to maintain this speed for a 100-meter dash, how many seconds would it take Jack to run the 100-meter dash?

35 (SECONDS)

16. These animals are members of the group Cingulata and they are related to anteaters and sloths. Their name comes from the Spanish for "little armored one." Identify these scaly animals seen in Texas and elsewhere in the South.

ARMADILLO(S)

D-R-O-U-G-H-T

19. This religious ceremony was once a staple of many Plains tribes. It occurred when the buffalo returned in late spring or early summer and required a large pole to be erected. What was this dance to honor the Great Spirit's manifestation as a celestial body?

SUN (DANCE)

20. The distance between the ground and the top of the torch on the Statue of Liberty is 93 meters. What is this distance in decimeters?

930 (DECIMETERS)

21. Multiple answers. They are three types of material traditionally plotted on a phase diagram. They are all more commonly seen and discussed, versus plasmas, super-cooled materials, or other phases. Name the three primary phases of matter.
- SOLID, LIQUID, GAS (any order)
22. She earned degrees from Princeton University, Worcester College, and Harvard Law School. She served as Solicitor General of the United States from 2009 to 2010. Name this Supreme Court justice appointed by President Obama in 2010.
- (ELENA) KAGAN [KAY-gun]
23. The total rainfall for three months was recorded by Mr. Smith's class. In October, it rained 1.5 inches; in November, it rained 3.2 inches; and in December, it rained 2.7 inches. What is the total amount of rainfall in inches for the three months?
- 7.4 (INCHES)
24. This novel's title building is a former stop on the Underground Railroad. Thomas Small explores his new home's hidden passages and discovers that the neighbors are trying to steal hidden treasure. What is this Virginia Hamilton novel?
- (THE) HOUSE OF DIES DREAR
25. Though the date of this folk song is unknown, this gospel song was used as an anthem during the Civil Rights movement in America. In what song does the singer state they are going to let the title object shine?
- THIS LITTLE LIGHT OF MINE
26. This mountain is part of the Alaska Range. The first recorded ascent of this mountain took place in 1913. Identify this tallest mountain in the United States.
- DENALI [duh-NAH-lee] (Accept MOUNT MCKINLEY)
27. To draw this musical note, use a solid head, a stem, and two flags. In 4/4 time, four of them are barred together to make one beat. Name this note, which is half the value of an eighth note.
- SIXTEENTH (NOTE)
28. They can come from comets, asteroids, or a similarly named object. They are objects that make it to the Earth's surface intact. What are these space objects, that strike the Earth, contrasted with meteoroids?
- METEORITE(S)
29. This picture book's narrator is a mouse whose toy airplane gets stuck in a tree. The title character convinces many animals to stand on top of each other to rescue the toy. What is this Caldecott-winning book by Eric Rohmann?
- MY FRIEND RABBIT

30. There are 1000 millimeters in a meter, so a millimeter is one-thousandth of a meter. What is one-thousandth of a millimeter?

MICROMETER

End of Second Half – Begin Three-Minute Inquiry Period

Extra Questions

- AH-1 With Mikhail Baryshnikov [buh-RISH-nuh-kawf], this woman was artistic associate of the American Ballet Theatre. She created choreography to accompany popular music by Frank Sinatra, Bob Dylan, The Beach Boys, and Billy Joel. Identify this modern dancer and choreographer of *Deuce Coupe* and *Movin' Out*.

(TWYLA) THARP

- SS-2 Many homes have these architectural ventilation structures, which also lend their name to a rock in North Carolina. The space inside these structures is called a flue. What are these structures in fireplaces used to remove smoke?

CHIMNEY(S)

- SC-3 This type of data might include measurements of mass, length, brain activity, or plant growth. Open-ended answers to survey questions are not this type of data. What is this type of numerical data, generally contrasted with qualitative data?

QUANTITATIVE (DATA)

- LA-4 What kind of dependent clause does the following sentence contain? When the rooster crowed, day began for the farmhands.

ADVERB(IAL) (CLAUSE)

- M-5 What is the solution to the equation five-sevenths X is equal to 15?

(X EQUALS) 21
